# Net Zero Commitment Statement

**Commitment: Net zero greenhouse gas emissions from UK operations by 2050 at the latest.**

Synergy Biologics Limited is committed to achieving net zero greenhouse gas emissions from its UK operations by 2050 at the latest.

We will measure and report Scope 1 and Scope 2 emissions and the subset of Scope 3 categories required by the UK Government Carbon Reduction Plan reporting standard. We will maintain and publish a Carbon Reduction Plan, review it at least annually and implement practical measures to reduce emissions from energy, company vehicles, freight and distributions, waste, business travel and employee commuting.

Our first measured organisational baseline covers 1 May 2025 to 30 April 2026.
The baseline footprint is 46.18 tCO2e.
Synergy has adopted an initial target to reduce reported emissions by 25% to no more than 34.64 tCO2e by 30 April 2031.

This commitment applies to Synergy Biologics Limited as the bidding entity and is intended to support the company's NHS Evergreen assessment and Carbon Reduction Plan obligations.

Approved and signed on behalf of Synergy Biologics Limited

Robin Deb
Managing Director
